

THE SPATZ 3

THE ONLY ADJUSTABLE GASTRIC BALLOON FOR WEIGHT LOSS NOW AVAILABLE AT JUPITER HOSPITAL

Intragastric balloon placement is a weight-loss procedure that involves placing a saline-filled silicone balloon in the patient's stomach.

This helps the patient lose weight by limiting how much they can eat and making them feel fuller faster.

The balloon is kept inside the stomach for minimum 1 year, after which it can be instilled with more saline if required post 4-5 months.

An intragastric balloon may be an option for the patient if they:

- have body mass index (BMI) between 27 and 40
- are willing to commit to lose weight through healthy lifestyle changes
- have not had any previous stomach or esophageal surgery

IT IS AN ENDOSCOPY OUTPATIENT PROCEDURE WHICH TAKES 15-20 MINUTES.

Dr. Prashant Salvi inserting a balloon in a patient's stomach in the endoscopy lab

The patient is sedated for the procedure.

The doctor advances the Endoscope loaded with the intragastric balloon into the stomach.

The Endoscope camera allows your doctor to see the balloon as he or she fills it with saline.

The patient can go home one to two hours after the procedure is finished.

We are excited to introduce you to the exceptional homecare services offered by Jupiter Hospital, aimed at bringing quality healthcare right to the patients' doorsteps.

Jupiter's Home Care Services offer:

- Unparalleled Convenience
- Comprehensive Services
- Exceptional Care and Support
- Safety and Quality Assurance

"At Jupiter Hospital, we understand the importance of providing comprehensive medical care in the comfort and familiarity of the patient's own home. Our homecare services combine convenience, expertise, and compassion to ensure that the patient receives the best possible care without the need for hospitalization"

- Mr. Sumit Goda, who is spearheading the Homecare Services

Our services include, but are not limited to:

Nursing Care | Physiotherapy | Doctor Consultations | Diagnostic Services | Medical Equipment Rental | Ambulance | Pharmacy

Jupiter Home care (JHC) is a fantastic service made available by Jupiter Hospital. Dr Sneha was always available to assist and guide. She made best staff available for home visit for my mother who is bedridden due to fractures and treatment which need her to be in bed for 40 days after operation. JHC sent good sisters & brothers (Jyostna, Samata, Shailesh, Alfaz, Manish) who did their job (catheterization, bladder wash, AB through IV) very well. Also Dr Shailesh visited when my mother couldn't pass enough urine..He did diagnose very well, read all files, asked multiple questions and treated very well.. I wish to express my gratitude for the kind service provided by JHC.

- Hemant Manjrekar (Patient Relative)

Jupiter Hospital's homecare is God's angel in need. I was really tensed when doctor told me to immediately administer the injection to my father who is taking cancer treatment. I was blank as I was unable to get him to the hospital. Then I remembered our homecare services. Their helping hand relaxed me within seconds. I called Ms. Prajakta madam and within a minute she arranged everything. Our nurse went home on priority and administered the injection consecutively for 2 days. It was far more than just care, they become your extended family members and run for your patients irrespective of any obstacles. A big thank you to the team, and God bless

- Ms. Sadhana Patane (Patient Relative)

Ever since home care services were started by Jupiter hospital, our patients are now able to receive world class supportive care in the comfort of their home. Be it small dressings or administration of injectables, many patients are now able to avoid prolonged hospitalisation for the same. A lot of grateful patients convey their deep gratitude for this service! Looking forward to see Home care services evolve into a strong pillar in patient care in the near future!

- Dr. Swapnil Kapote (Onco Surgeon)

New patient registrations now made convenient across Jupiter Hospital

We are thrilled to announce a radical addition to our registration process that will streamline and enhance patient experience at our hospital.

Starting this month, we have successfully deployed QR codes as a quick and convenient way to register new patients across all three locations - Thane, Pune, Indore.

The QR codes are strategically displayed at each OPD counter across the hospital

The benefits of using QR codes for patient registration include:

- **Time efficiency:** Bidding goodbye to paperwork and manual data entry, QR code will reduce wait times significantly.
- **Data accuracy:** By eliminating manual input, the chances of errors are minimized, ensuring medical records are up-to-date and precise.
- **Contactless experience:** QR codes offer a contactless registration option, promoting a safe and hygienic environment for all.
- **Contributing to the environment:** Will be saving tonnes of paper by getting the registration process on digital medium
